

## Automata Assignment 1

### 1. Give DFA for the following languages, over the alphabet {0,1}.

- a) Set of all strings that are at least of length 4 and contains even number of 1's.
- b) Set of all strings with number of 0's is divisible by 5 and number of 1's is divisible by 3.
- c) All strings where each 0 is followed by consecutive two 1's.
- d)  $L = \{w | w \text{ has even number of 1's and one or two 0's}\}$
- e)  $L = \{w | w \text{ contains neither the substrings 01 nor 10}\}$
- f) Set of all strings that end with 11 and length is divisible by 3.

### 2. Give NFA/c-NFA for the following languages, over the alphabet {0,1}.

- a) All strings containing exactly 4 0s or an even number of 1s.
- b) All strings such that the third symbol from the right end is a 0.
- c) All strings that contains an even number of 0s or exactly two 1s.
- d) The set of strings that start in 1 and end in 01.
- e) All strings that end with two consecutive same symbols.

### 3. Convert to a DFA the following NFA.

	0	1
$\rightarrow p$	$\{p, q\}$	$\{p\}$
q	$\{r\}$	$\{r\}$
r	$\{s\}$	$\phi$
*s	$\{s\}$	$\{s\}$

- 4. Draw a NFA of a set of strings over an alphabet  $\{0, 1, \dots, 9\}$  such that the final digit has appeared before.
- 5. Draw a NFA of a set of strings over an alphabet  $\{0, 1, \dots, 9\}$  such that the final digit has not appeared before.
- 6. Draw a DFA of a set of string that start with ab and end in bc where alphabet is  $\{a, b, c, d, e\}$ .

### 7. Convert to a DFA the following NFA.

**7. Convert to a DFA the following NFA.**

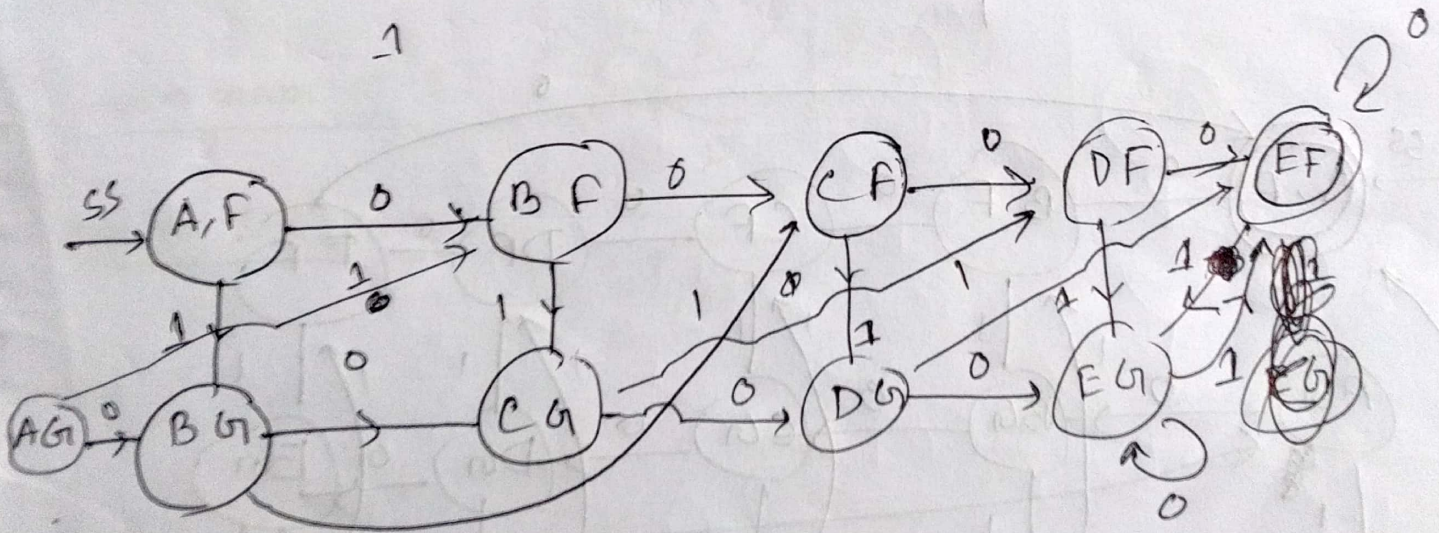

1. (a)

Set of all strings that are atleast of length 4

$$\begin{aligned}
 \text{Reg} &= (0+1)(0+1)(0+1)(0+1)^* \\
 &= (0+1)^4
 \end{aligned}$$

even number of 1's

1 b)

c)

1d)

$L = \{ w \mid w \text{ has even num of 1's and one or two 0's} \}$

one or 2 0's  $\rightarrow$  one 0:

two 0's

one or 2 0's:

even num of 1 and one or 2 0's:

1 e)

Doesn't contain 01

Doesn't contain 10

1 f)

end with 11

divisible by 3

2(a)

2b)

2c)

2d)

2e)

3/  $p, q, r, s$

	0	1
(A) $\rightarrow p$	B	A
(B) $pq$	D	C
(C) $pr$	E	A
* (H) $p's$	E	H
(D) $pqr$	F	C
* (E) $pqs$	F	G
* (F) $pqr's$	F	G
* (G) $p'r's$	E	H

for, 1 has appeared before

for nine has appeared before

for 0-9 has appeared before

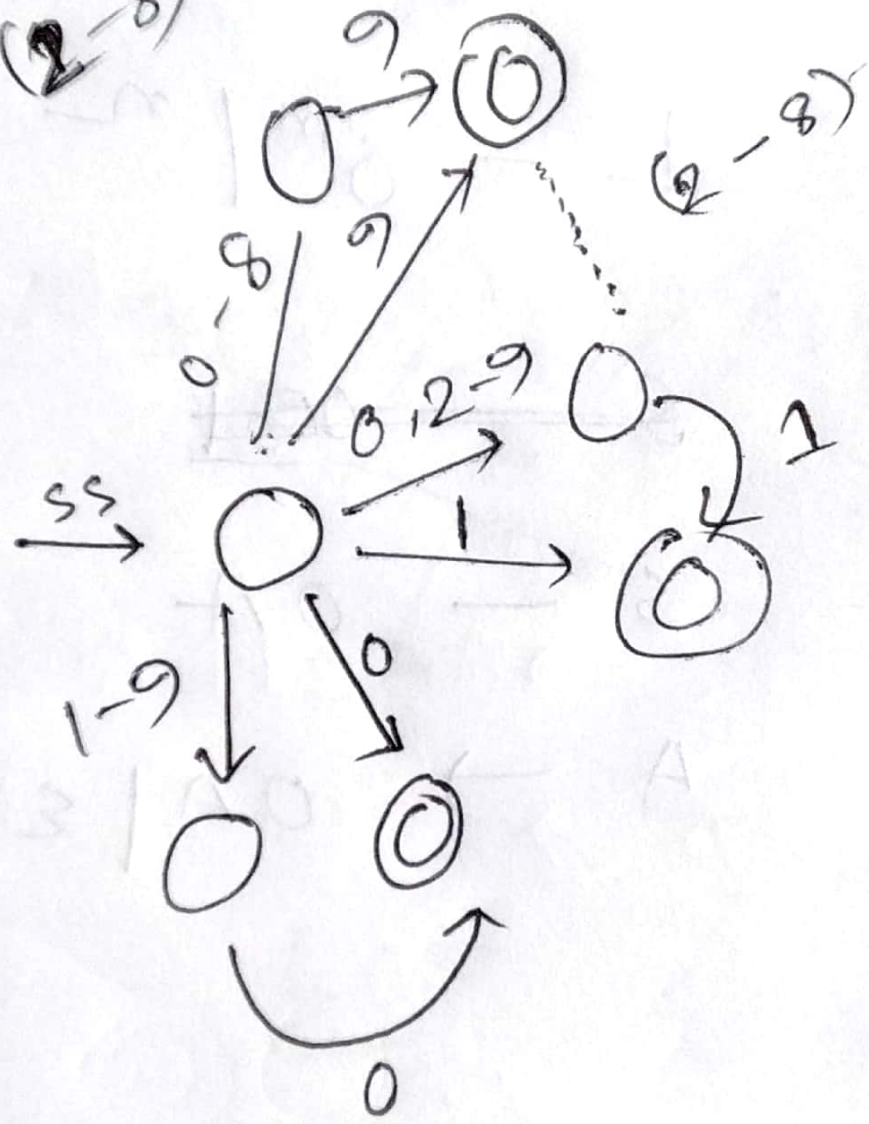

assuming there are

2 to 8 such ways.

Assuming there are such cases for (2-8)

5.

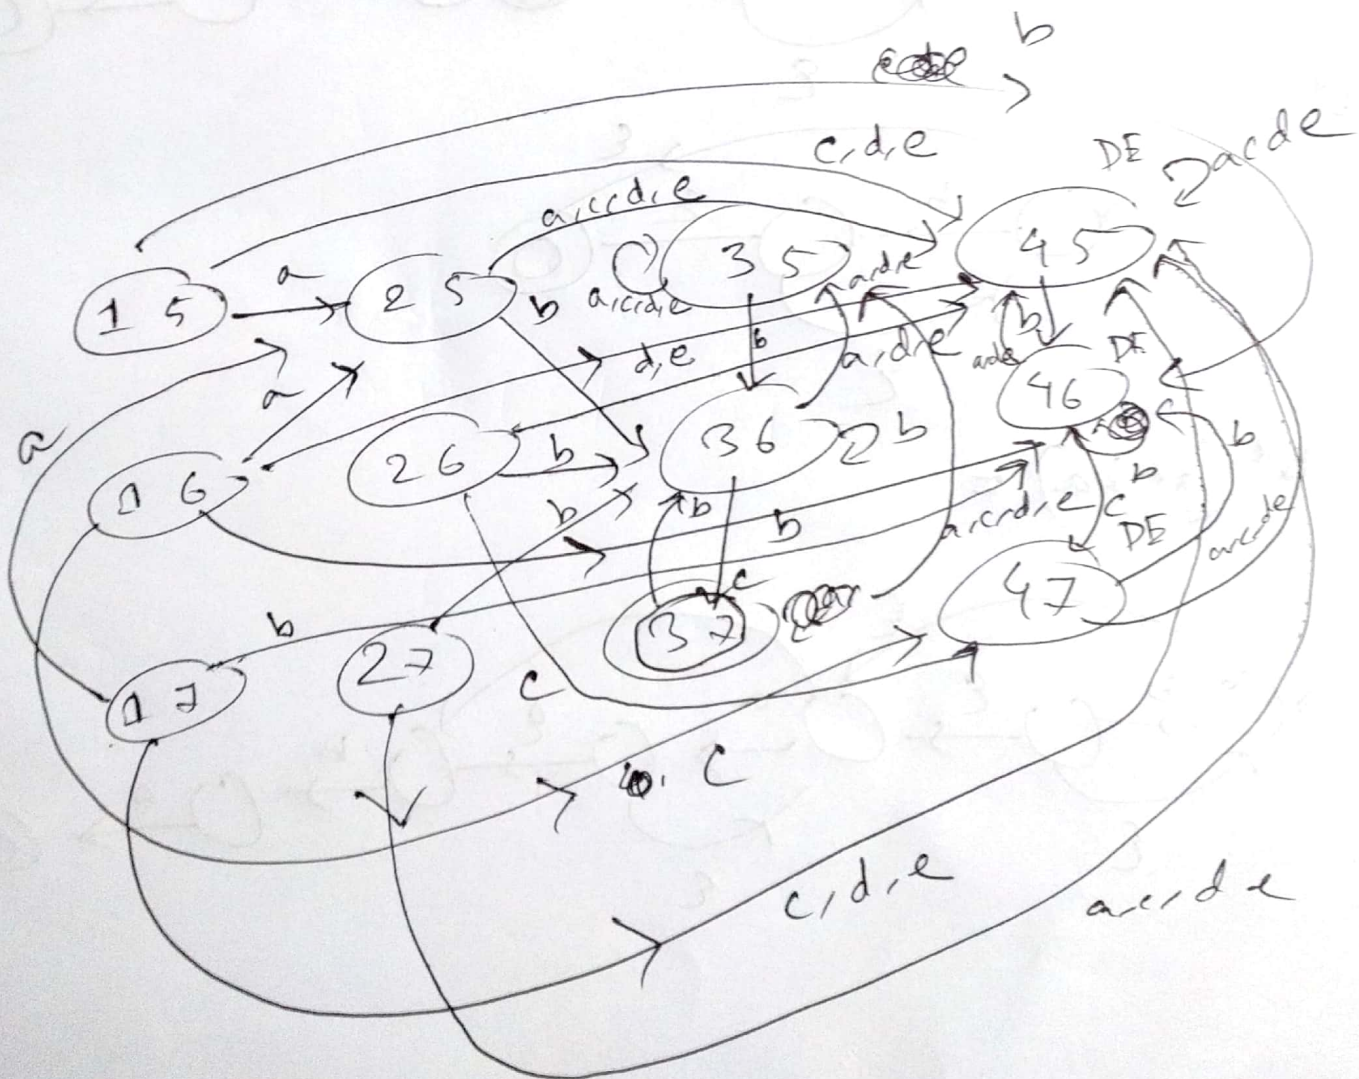

→ with ab

ss → ①  $\xrightarrow{a}$  ②  $\xrightarrow{b}$  ③  $\xrightarrow{c}$  ④  $\xrightarrow{d}$  ⑤  $\xrightarrow{e}$  ⑥  $\xrightarrow{f}$  ⑦  $\xrightarrow{g}$  ⑧  $\xrightarrow{h}$  ⑨  $\xrightarrow{i}$  ⑩  $\xrightarrow{j}$

berdie  
arcidie  
PE  
arclde

2.

$2 \rightarrow 2, 3, 5$

State	a	b	c
$\rightarrow 1$	2, 3, 5	5	$\emptyset$
2, 3, 5	$\emptyset$	5	4
<del>4</del>	3	$\emptyset$	2, 3, 5
5	$\emptyset$	$\emptyset$	4
3	$\emptyset$	5	$\emptyset$

	a	b	c
$2 \rightarrow$	$\emptyset$	$\emptyset$	$\emptyset$
$3 \rightarrow$	$\emptyset$	5	$\emptyset$
$5 \rightarrow$	$\emptyset$	$\emptyset$	4
